Re: Advertising with "The Black Book".

In my trade and or business advertising can make or break you. I poll each client that comes through the door as to how they have heard of me and my statistics show that 85% of new business came to me as a result of my Black Book advertising.

Furthermore, my ad, "A Country Lawyer", has helped in keeping me first in the book.

As a result of my poll, I have cut back on other advertising as a result of less return for my investment.

I would recommend "The Black Book" for all your advertising needs.
