"Eatel and the SunShine Pages have been the best advertising money that we have ever invested in"

I wanted to take this opportunity to express my gratitude for the extremely valuable, long term relationship our two companies have enjoyed for many years.

Eatel and the Sunshine Pages have been the best advertising money that we have ever invested in. The fantastic ROI (return on investment) is a testimony to the varied products and service your company offers. From the traditional print, to your digital marketing, we remain convinced that we are investing our hard earned money in the best form of advertising we do.

As you are aware, we have invested in a wide range of media for our advertising. These have included billboards, shopping carts, church bulletins, chamber on commerce, and school sports sponsorships, to name a few. Traditionally, the measurable return of these investments has been underwhelming and weak.

It has been a pleasure to work with you and your company through the many years of our professional relationship. It is through your hard work, and those with whom you work, that has helped make our business a success.

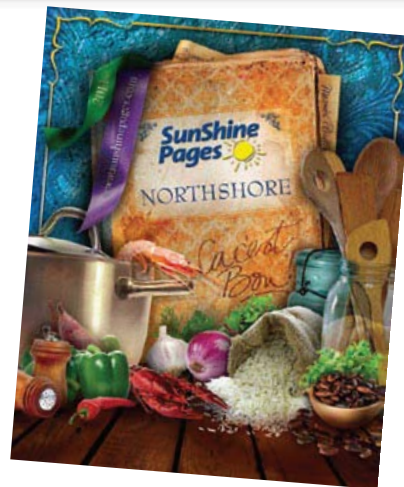

Thank you for your attention to our business and for helping us stay in front of our potential customers and clients as well as dominating the digital domain.

Sincerely,

Scott Leonard
